Claim Rejection under 35 USC 103(a)

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Policello et al (US 5558806; 9/24/96) and Herve' et al (US 4440756; 4/3/84). Policello teaches an agricultural crop oil (vegetable oil) composition comprising pesticides plus an organosilicone compound where $x=1$; R = formula II; $n=3$ or 4 ; $a=1$; $b=0$; $R_2=H$, C_1 - C_4 alkyl; or acetyl. The organosilicone compound taught by Policello is the instant organosilicone compound where $R_1, R_2=CH_3$; $Y=1$; $Z=R_3OBnG$ where $R_3=C_1$ - C_4 alkylene; B = alkylene oxide; $n=1$; $G=H$, alkyl, or acetyl. See abstract, column 1 lines 10-23, column 1 line 65 - column 2 line 11, column 2 lines 21-44, column 6 line 7 - column 8 line 53. Policello does not teach the agrochemical crop oil comprising a dye. However, Herve' teaches an agrochemical composition comprising a dye. It would have been obvious to one having ordinary skill in the art to add the dye taught by Herve' to the agrochemical composition taught by Policello. One would have been motivated to do this in order to increase the light-stability of the agrochemical composition.

Claim Objection

Claims 16,17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the instant invention comprising application of the instant organosilicone compounds to plant seed.

Telephonic Inquiry
